Irina Krylova

UX/UI Designer   Web Developer   3D Visualizer

PROFILE

I have a diploma of secondary vocational education in the specialty "Information systems". I periodically take courses and intensive courses in development and UX/UI design.

One day, during my studies, I got acquainted with the basic technologies of web development. I was so attracted to this direction and I began to study more deeply, studying modern technologies, methods and ways of developing web applications with a marketing design.
